

COOPER MAITOZA

US Citizen | Maitoza2@gmail.com | (435) 703-3689 | [LinkedIn](#) | [Website ->](#)

SKILLS:

Skills: **C++**, **C**, **C#**, **Python**, SQL, ASM/MASM, ASP.Net, Django, MERN, Embedded Software, Data structures, OOP

Soft skills: Communication, Collaboration, Punctuality, Attention to detail, Friendliness, passionate

EXPERIENCE

Student Programmer Internship | Weber State University | Software Maintenance and Development | August – December 2024

- Developing features, managing Oracle databases, maintaining codebase, and fixing bugs for an ASP.NET application using C#. This application is in production for administrative work at Weber State University.

Senior Project | Testing Algorithms and Data Structures | August – December 2024

- Build and test algorithms and data structures to run against each other to compare time and processing power. Developed CLI program using C++ to create data structures like hash tables, linked lists, etc. Created tests for edge cases so the user can compare different data structures against each other. Worked with a small team of developers to develop features using an agile methodology.

Weber State University | National Testing Proctor | December 2022 – December 2024

- Administered and proctored various exams, including midterms, final exams, placement tests, and certification exams, for a diverse student population. Utilized testing software and online platforms to facilitate computer-based exams, troubleshoot technical issues, and support test-takers during the testing process.

EDUCATION

Weber State University | **BS in Computer Science** | GPA: 3.98 | Graduated December 2024

- Concentrations: Software Engineering and Development
- Related Coursework: Data Structures & Algorithms, Objects & Design, Computer Organization & Programming, Object-Oriented Programming, Computer Arch., .NET frameworks, Operating Systems.

Weber State University | **AS in Computer Science** | GPA: 3.98 | Graduated April 2024

- Related Coursework: Data Structures & Algorithms, Objects & Design, Computer Organization & Programming, Object-Oriented Programming, Computer Arch., .NET frameworks, Operating Systems.

Southern Utah University | **BS in Geology** | Graduated May 2022

Continue pg. 2

HOBBIES

Rock climbing, Fly-fishing, Backpacking, Back-country skiing, Mountain/Road biking, Amateur electronics, PC gaming, Reading, Pickle ball, and Enjoying life.

PROJECTS

Senior Project:

An educational website with a C++ CLI program running on a Linux server for testing algorithms and data structures against each other to compare time complexity and memory usage.

- Wrote hash table algorithms and testing functions using C++.
- <https://github.com/bradleypeterson/AlgoGauge>

Social Savoring (Personal Project):

A recipe sharing social media application written in python using Django.

- <https://github.com/Weber-Cooper-Maitoza/social-savoring.git>

The Toast Computer (Personal Project):

An 8-Bit Computer built with modern components on a bread board using the 65C02 CPU and programming an EEPROM using Assembly. (WIP)

- Computer Architecture, Electronics, Data Structures, 6502 ASM, Microprocessor development.
- https://github.com/Weber-Cooper-Maitoza/Toast_Computer.git

BLE Volume Device (Personal Project):

Bluetooth volume control device using an ESP32 Microcontroller and BLE communication. (WIP)

- Embedded software, Electronics, C++/C, BLE Communications and protocols.
- (Work In Progress)
